

SCIENCE HACK DAY

[Science Hack Day](#) is a two-day event where anyone excited about making things with science comes together in the same physical space to see what they can prototype within 24 consecutive hours. Attendees organically form multidisciplinary teams over the weekend. Science Hack Day is inherently about mashing up ideas, mediums, industries and people to create sparks for future ideas, collaborations and inspirations to launch from. Designers, developers, scientists and people from any background are welcome to attend. The event is entirely free to attend, organized by volunteers, and supported via sponsors.

DETAILS

The 10th annual San Francisco event will host 200 attendees at GitHub HQ on October 19-20, 2019. The typical breakdown of attendees at a Science Hack Day is 33% developers, 20% scientists, 20% artists/designers and the rest are a mixed bag of everything from writers to roboticists to lawyers. Women have consistently represented 33-40% of the attendance each year. To date, over 100 Science Hack Day events have been held worldwide across 30 countries.
